LinkedIn | Applied AI Lab

**Program Leadership and Change Enablement**

Program operations leader with experience coordinating stakeholders, standardizing workflows, and communicating across distributed teams. Background spans cross-campus education programs, national event operations, and AI quality evaluation. Builds practical documentation, automation, and learning resources to help people carry out new processes and understand expectations.

## Core Skills

Stakeholder coordination | Communications and documentation | Workflow standardization | Implementation tracking | Training resources | AI quality evaluation

## Professional Experience

### Senior Domain Expert - AI Workflow Evaluation

Mercor Intelligence | Remote | 2025 - Present

- Analyze recurring output failures, ambiguous requirements, and edge cases in AI evaluation workflows.
- Apply rubric-based review and calibration techniques to support consistent expectations across distributed reviewers.

### Project & Operations Coordinator

Springdale School District | Springdale, AR | 2012 - June 2026

- Coordinated timelines, ownership, and deliverables across 20+ internal stakeholders and three campuses; maintained visibility through structured task tracking and communication.
- Developed SOPs and documentation to standardize processes and reduce onboarding friction; designed automation workflows that saved 100+ administrative hours annually.

### Program Lead & Operations Manager (Athletics)

Springdale School District | Springdale, AR | 2012 - June 2026

- Managed operations for 40-60 athletes and coordinated 20-30 events annually; standardized communication workflows, reducing scheduling conflicts by 25%+.

### Outreach Director (National Operations)

National Amateur Disc Golf Tour | Remote | 2022 - 2023

- Coordinated documentation and workflows for 80+ national events, aligning distributed organizers and partners.
- Built standardized handoff documentation and supported 1,000+ participants through operational communication and issue resolution.

## Selected Portfolio Project

### Applied AI Lab

Created a seven-module learning portfolio covering practical AI use, verification, oversight, workflow design, and adoption. Developed scenario-based assessments, reference resources, and demonstration analytics using simulated data.
